

## 28/2A.1 Multi-Hull Loads

- 28 Gauge Multi-Hull 28/2A.1
- Manufactured by Cheddite to BPI MultiHull specifications

### *Editorial notes:*

For better roll crimps (and fold crimps) in the 28 gauge, use an overshot card on top of the shot.

Often for the 28 gauge, we utilize the .070" Mini nitro card as an overshot card. A thicker overshot card often offers a better closing for roll-crimped loads because it offers a sturdier base on which to roll the crimp. The reloader will also find that a cardboard disk (either an overshot card or nitro card) under a fold-crimp greatly assists in producing a pleasing final crimp. (The Maxi nitro card may be split into two thinner cardboard disks by applying thumbnail/knife-edge pressure to the side of the card.)

The Multi-hull crimps easily. On the first firing, give it some extra time at the crimp start station to develop a memory in the plastic.

The CH209 primers referred to in the data are Cheddite 209 primers that come with these Multi-Hulls.

### Key Components you will need:

- ✓ Multi-Hull 28/2A.1 - 2-3/4" hulls
- ✓ Choice of powder
- ✓ BW28, HV28 or SG28-II Wads
- ✓ Overshot cards wads

load ID	gauge	length	hull	primer	powder	grains	gas seal and/or wad	filler wad or internal wrap	shot (oz.)	shot type	shot buffer	P.S.I.	F.P.S.	load notes/ application

**Warning:** Where data contained on this label and in catalogs and booklets list specific components; no changes or substitutions for these components can be made, except substitutions of shot sizes that will equate to exactly the same weight charge listed, without risking significant changes in the level of ballistic performance and/or safety of the loads shown. Follow loading data exactly and do not substitute components. We make no warranties, express or implied; limited or full; specifically disclaim any and all warranties of fitness for particular purpose and merchantability; and specifically disclaim any and all liability for consequential damages of any kind whatsoever. Failure to comply with standardized warnings of reloading, lead and all other pellet types; dram equivalence; powder and primer storage and measurement; component applications and the safe and appropriated use of firearms per se or the use published data exactly as shown may result in accidents with serious injury and/or death to the shooter and/or bystanders.
