## NON-TOXIC TUNGSTEN ALLOY SHOT WITH TIN PLATING

Our new BPX Devastator shot is only available at BPI. In partnership with the world's preeminent manufacturer of non-toxic shot, we've developed a new type of shot with a high-density tungsten alloy core and covered in a protective tin plating. The result is a near perfect sphere of high density and devastating lethality.

**DEVELOPMENT:** BPX Devastator blends materials in order to achieve an ideal ballistic balance between enhanced density, pellet count, spherical precision, and overall hardness. This unique pellet core consists mainly of high-density tungsten. It is lethal on turkeys, ducks, geese, and just about any other game birds. It is manufactured to a target density of 12.0 grams/cc, **which is about 5.5% denser than magnum lead shot.**

**PACKAGING:** BPX Devastator is a premium shot and it is packaged in our new Sturdy-Pak bottle, which features a convenient pour spout for easy, spill-resistant loading.

BPX Devastator is currently available in sizes BB, 1, 2, 4, 5, and 6.

\* USFWS approved non-toxic

\* Pellet Sizes: #BB = .180" (4.57 mm), #1 = .156 (4.00 mm), #2 = .150" (3.81 mm), #4 = .128 (3.25 mm), #5 = .118 (3.00 mm), #6 = .109 (2.75 mm)

*This [#4] shot is great for ducks and even geese at reasonable ranges. Patterns like a dream out of my Rem VX3 with a Mod choke. Makes rolling your own using BP recipes time well spent.*

*- Chuckles, MN*

*Great for pass shooting. Retains downrange energy exceptionally well.*
