

BPX Devastator Shot

Non-toxic tungsten alloy shot with heavy tin plating

Our new BPX Devastator shot is only available at BPI. In partnership with the world's preeminent manufacturer of non-toxic shot, we have developed a new type of shot with a high-density tungsten alloy core and covered in a protective tin plating. The result is a near perfect sphere of high density and devastating lethality.

BPX Devastator blends materials in order to achieve an ideal ballistic balance between enhanced density, pellet count, spherical precision, and overall hardness. This unique pellet core consists primarily of high-density tungsten. It is lethal on turkeys, ducks, geese, and just about any other game birds. It is manufactured to a target density of 12.0 grams/cc.

Packaging: BPX Devastator is a premium shot and it is packaged in our new *Sturdy-Pak* bottle, which features a convenient pour spout for easy, spill-resistant loading.

BPX Devastator is currently available in sizes 1, 4, 5, and 6.

*USFWS approved non-toxic

*Pellet Diameters: #1 = .156 (4.00 mm), #4 = .128 (3.25 mm), #5 = .118 (3.00 mm), #6 = .109 (2.75 mm)

NOTE: The shot size listed is indicative of the filler was required for that particular shot size. Your filler was may vary according to the shot size used.

WARNING: Where data contained here, on labels and in catalogs and booklets list specific components, no changes or substitutions for these components can be made, except substitutions of shot sizes that will equate to the same weight charge listed, without risking significant changes in the level of ballistic performance and/or safety of the loads shown. Follow loading data exactly and do not substitute components. We make no warranties express or implied, limited or full. Failure to comply with these and other standards of reloading may result in accidents with serious injury and/or death to the shooter and/or bystanders. © 2020 Ballistic Products, Inc.
